Nanovia 3D Printer Bed Cleaner :

Better adhesion

Nanovia 3D Printer bed cleaner eliminates the thin plastic layer deposited after each print and allows for a better adhesion for the next.

Properties

How to use

- Spray the 3D printer bed, then wipe the surface with a soft piece of cloth or absorbing paper.
- If needed repeat the cleaning process. Do not wash away, the product quickly evaporates after wiping.
- Do not use on a warm printer bed.

Packaging

Volume	500ml
Colour	Pink
